Dr. Daniel Mardare
Stud. Tudor Grămada

Dear colleagues,

We have the pleasure of inviting you at our 1st National Conference on tobacco control, entitled "Tobacco and Health", to be held in Iasi, 9-11 March 2006.

With a long history, tobacco smoking is a very serious problem, concerning medical doctors, researchers in health sciences, economists as well as the entire population.

In June 2001, In Mamaia, Romania we had a workshop on the medical assistance given to smokers; that was the first attempt in making our activity known nationwide, increasing therefore awareness of pulmonary specialists.

In the last five years tobacco consumption increased tremendously, 44% of our population being a victim of this addiction, with 50% of Romanian physicians being among the smokers.

Therefore we consider as extremely important to resume our talks concerning smoking addiction and what we can do to decrease it, during our yearly meetings of the Romanian Society of Respiratory Diseases, hoping that both pulmonary specialists as well as patients will benefit.

Many specialists from our country and overseas will be invited, creating a true exchange of opinions among the best in this field; also we will make our discussions and conclusions known to the media, creating an alert to entire population.

Your presence at this meeting will honor us and will help in creating a lobby as well as an exchange of opinions in this field.

We warmly greet you in the city of Iasi, known for its rich cultural and educational tradition, to join us in spring 2006.

**President of
Romanian Society of Pneumology
Prof.Dr.I.P.Stoicescu**

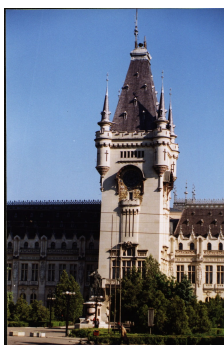

**Organizing committee,
Coordinator:
Ass. Pr. Dr. Antigona Trofor**

Additional information regarding registration fee, hotel reservation, credits, will be available on the clinic's site www.pneumo-iasi.ro, soon after 1st of December.
